About Me

Enthusiastic third year B.E undergraduate in Electronics and communication from Vasavi College of Engineering. On a mission to secure internships in Web Page development and collaborate with professionals to make the project successful. Joining your team as an intern would be a significant step toward achieving my goals and making a meaningful impact

Project:

Currency Determination for visually impaired

- Created a CNN-based device to help visually impaired individuals differentiate Indian currency denominations. The device uses image comparison to recognize denominations and provides voice output for easy identification.

Movie Reviews Webpage

- Created a small website catering to movie enthusiasts, offering access to a wide range of movie reviews. This project involved the development of a secure user login system, enhancing user engagement and providing a personalized experience. Additionally, I implemented a language selection feature to accommodate a diverse audience, showcasing my skills in web development, user authentication, and user interface design.

Courses and Certificate:

- **The Joy Of Computing Using Python**
authorized by National Programme on
Technology Enhanced Learning

Declaration:

- I hereby declare all the information stated above is true to the best of my knowledge
